An Introductory Guide to NA

The introduction to a research paper can be the most challenging part of the paper to write. The length of the introduction will vary depending on the type of research paper you are writing. An introduction should announce your topic, provide context and a rationale for your work, before stating your research questions and hypothesis.

Introductory Guidance on the CLP Regulation

An introduction generally does three things. The first part is usually a general comment that shows the reader why the topic is important, gets their interest, and leads them into the topic. It isn't actually part of your argument. The next part of the introduction is the thesis statement. This is your response to the question; your final answer.
