environmentally integrated approach to architectural design. Organic architecture strives to unify space, to blend interiors and exteriors, and create a harmonic built environment that is not separate or dominant from nature but part of a unified whole.

The Natural Harmony of Organic Architecture

The goal of organic

Where To Download An

Organic architecture was the creation of buildings whose forms were dictated by function and surroundings, as is the case with organisms in nature. The concept of organic architecture was first formulated in the 1890's by the American architect L. Sullivan, who was influenced by the evolutionary theory in biology.
