Review of 'Archaeological Typology and Practical Reality ...

In archaeology, a typology is the result of the classification of things according to their physical characteristics. The products of the classification, i.e. the classes, are also called types. Most archaeological typologies organize portable artifacts into types, but typologies of larger structures, including buildings, field monuments, fortifications or roads, are equally possible.

Amazon.com: Archaeologcl Typology Prac Reality: A ...

Typology is a method that compares reference objects in order to classify them according to their similarity or dissimilarity and link them to a specific context or period. This technique is frequently used when it is impossible to make use of absolute dating methods; it generally allows archaeologists to identify the period to which a cultural site or object belongs, without specifying the ...
