Hi all, I'm fairly new to tuning Fords in general, and to the forum, but have used HP Tuners to tune several GM vehicles. So I recently swapped out my 5r55s automatic transmission for a GT500 6-speed tr6060 in my 2006 Mustang GT. My issue is trying to get the PCM flashed with a manual strategy. I tried to tune it by disabling the automatic functions on my current auto tune.

Real-time or Manual - Autotune made a name for itself by literally "auto-tuning," chromatically in real-time, and this is an important aspect to have in certain studio situations, such as tracking with a vocalist who isn't the best. Inversely, while real-time tuning applications are great for mixing, they are not great for fine-tuning a ...
