These ASCOM drivers are for your Celestron mount, not the Skyris camera. Skyris will work in other programs as outlined in step 2. Download and install a popular autoguiding program of your choice, such as PHD Guiding. The camera works with a number of other programs such as Maxim DL, Guidemaster, MetaGuide, and more.

How do I use Skyris as an autoguider? | Celestron ...
The Off-Axis Guider is an essential astroimaging accessory for long focal length telescopes that require the most accurate guiding possible. The Celestron Off-Axis Guider uses a prism to intercept a small portion of the telescope's focal plane (outside the field of view of the main imaging camera) to locate a guide star.

Off-Axis Guider | Celestron - Telescopes, Telescope ...
Now you can get a complete guidescope package from Celestron which includes both 80mm refractor and 125mm rings. No need to fumble in the dark with an uncomfortable diagonal, because the included extension tube helps you to easily reach focus.

80mm Guidescope Package | Celestron - Telescopes ...
Autoguiding is accomplished by sending small corrections to your telescope mount via an ST-4 cable communicating from your guide camera to the mount. You can also autoguide using the pulse-guiding method that utilizes a direct connection from your PC to the telescope mount.
