Where To Download How Vaccines Work

Vaccines to the
Rescue: Vaccines offer
a solution to this
problem. They help you
develop immunity
without getting sick
first. Vaccines are
made from the same
germs (or parts of
them) that cause
disease; for example,
polio vaccine is made
from polio virus. But
the germs in vaccines
are either killed or
weakened so they
won't make you sick.

Where To Download How Vaccines Work

more than one dose: •
For some vaccines (primarily inactivated vaccines), the first dose does not provide as much immunity as possible. So, more than one dose is needed to build more complete immunity. The vaccine that protects against the bacteria Hib, which causes meningitis, is a good example.

Understanding How Vaccines Work

Where To Download How Vaccines Work

In a sense, the vaccine tricks the body into thinking it is under assault, and the immune system makes weapons that will provide a defense when a real infection becomes a threat. Sometimes one dose of a vaccine is enough to protect a person, but often more than one dose is needed. Some antibodies protect for a lifetime, but others need boosting.
