A submarine pipeline (also known as marine, subsea or offshore pipeline) is a pipeline that is laid on the seabed or below it inside a trench. In some cases, the pipeline is mostly on-land but in places it crosses water expanses, such as small seas, straits and rivers. Submarine pipelines are used primarily to carry oil or gas, but transportation of water is also important.

Submarine pipeline - Wikipedia

Kochi: The much-delayed Kochi-Mangalore natural gas pipeline project is finally ready for commissioning any day from now as the national energy major Gail India has completed the final 540-metre treacherous stretch across the Chandragiri river in northern Kerala, according to a senior company official.
