The 2020 DeWitt Stetten Jr. Lecture on "Rethinking General Anesthesia" will be given by Dr. Emery N. Brown on Wednesday, Nov. 18 from 3 to 4 p.m.

Doctors have employed general anesthesia for more than 165 years in the United States, and more than 100,000 Americans receive this medical treatment each day for surgery. Still, how anesthetic drugs work has long remained a mystery.

Lecture Notes: Clinical Anaesthesia

His lab studies arousal states in general anesthesia and sedation, which involves developing a detailed understanding of the neural circuitry of the brain stem, thalamus, and cortex. Dr. Brown's discoveries have led to new ways of monitoring patients' brain states during general anesthesia, as well as strategies for drug dosing and precisely controlling the anesthetic state.
