Light sources and shadows. There are many sources of light - stars like our Sun, candle flames, light bulbs, glow-worms and computer screens produce light. All of this light travels in a straight line until it hits something. Sometimes, it travels a short distance - like when we switch on the lamp.

Shadows in the Material environment are cast by a key light and ambient light. In Android and iOS development, shadows occur when light sources are blocked by Material surfaces at various positions along the z-axis. On the web, shadows are depicted by manipulating the y-axis only. The following example shows a card with an elevation of 6dp.

Light. There can be no shadow without light. And the darker the shadow, the brighter the light. Even when we don't see it the light accompanies us through the valley. It is already a present reality. It was there the day Ashley died and it is here today. The shadow is not the ultimate reality. It is, rather, proof that the light is also here.

a) The sun is a source of light b) The person always has a shadow c) The person blocks light from the sun d) Light from the sun passes through the person e) The shadow is the same shape as the person 4) Telling the time.

## **Light and Shadow - Quiz - Wordwall**

For unless created by still artificial light, a shadow is always moving and changing- often very quickly since its very existence is directly tied to the movement of the earth relative to the sun. Drawing and painting shadow and light can place us in direct contact with this natural movement and change.

## **Light and Shadow - Creative By Nature Art**

Cast Shadow: Just like your own shadow on the sidewalk on a sunny day, a cast shadow is a -distorted- projection of the shape of the object. The length of the shadow and its direction depend on the direction of the light. On the Copic Marker scale, this would be N8.
