Chart Is For Reference Only, Since Many Aftermarket Parts Manufacturers DO List Parts By Year A "0" in front of the serial number is not significant, it's a placeholder only for Mercury's software. So if your serial number is "0 1234567" you would use only the "1234567" part of it when looking at the chart below

I used to own a 1976 Mercury 500, which is a four-cylinder in-line motor of 44-cubic-inch displacement and 50-HP rating. It was a very good motor. It ran very smoothly. Prior to c.1983 it was common that the power rating of an outboard motor was taken as the power at the crankshaft output.

Discussion Areas

I have a Mercury 1987 classic 50 4 cylinder 45 hp outboard on a 16 foot bass boat. It takes it a long long time to plane out and go to 4000 rpm. It recently started doing this. It achieves 4000 rpm quickly with the little throttle tab on the control quadrant while the boat is still but not when gunning it with the big throttle control.
