Metaprogramming Elixir : Write Less Code, Get More Done ...

Metaprogramming, which we previously defined as « code to generate code » could be achieved by generating raw Elixir code (as strings) but it would be inefficient and hardly maintainable. That's why Elixir provides API's to generate and evaluate AST. Here comes quote: an Elixir primitive which can convert any Elixir code into its AST.

On Elixir Metaprogramming - christianblavier.com

Last year, my co-contributor to Exercism.io wrote a fantastic article about writing a TypeScript code analyzer, and I wanted to follow up by sharing my thoughts and experiences writing one for Elixir.. In case you have not yet read that article, Exercism.io is a free platform designed to help you improve your coding skills through practice and mentorship.

Writing an Elixir Code Analyzer (with metaprogramming ...

Metaprogramming is the process of using code to write code. In Elixir this gives us the ability to extend the language to fit our needs and dynamically change the code. We'll start by looking at how Elixir is represented under the hood, then how to modify it, and finally we can use this knowledge to extend it.
