Before the Northstar

Access Free Northstar V8 Engine

engine was produced, Cadillac was using the HT Overhead Valve V8, which is a piston engine that uses valves located in the cylinder head above the combustion chamber. Cadillac began producing new models to use the Northstar engine that he hoped would be direct competition against the luxury cars from BMW, Mercedes, and Lexus.

Engine Problems | It Still Runs

Throughout its run the Northstar was a Cadillac only engine. Only until the mid 00's did GM give the engine to other models with it being used in the performance model Pontiac Bonneville GXP and in both the Buick Lucerne Super and the regular Lucerne V8. Oldsmobile got a variant of the Northstar called the L47
