Plexus Injuries

Minor brachial plexus injuries, known as stingers or burners, are common in contact sports, such as football. Babies sometimes sustain brachial plexus injuries during birth. Other conditions, such as inflammation or tumors, may affect the brachial plexus. The most severe brachial plexus injuries usually result from automobile

Brachial plexus injury - Symptoms and causes - Mayo Clinic

An obstetric brachial plexus lesion (OBPL) is thought to be caused by traction to the brachial plexus during labour.^{1, 2} In most cases, delivery of the upper shoulder is blocked by the mother's symphysis (shoulder dystocia). If

Get Free Obstetric Brachial Plexus Injuries

additional traction is applied to the child's head, the angle between neck and shoulder may be forcefully widened, further stretching the ipsilateral brachial plexus.
