Accurate People Counting Sensors & Software | Traf-Sys

People counting is the use of an electronic device (traditionally called a people counter or footfall counter) to measure the number of people that pass through a certain passage or entrance. Irisys is a world leading authority on this technology and over 500,000 of our people counters are installed worldwide.

People Counting — Discover The Benefits | Irisys

Abstract: This paper presents an automatic people counting system based on face detection, where the number of people passing through a gate or door is counted by setting a video camera. The basic idea is to first use the frame difference to detect the rough edges of moving people and then use the chromatic feature to locate the people face.

The base 5 system likely originated from ancient peoples using the digits on one hand to count. The base 12 system likely originated from other groups using their thumb as a pointer and counting by using the three parts on four fingers, as three multiplied by four equals 12. The main fault of the Babylonian system was the absence of a zero.
