The dynamics equation of multibody systems with clearance joint is established using a dynamic segmentation modeling method. The planar four-bar mechanism is used as demonstrative application example. Numerical results for four-bar mechanisms with multiple revolute clearance joints are presented and discussed.

A study on dynamics of planar multibody mechanical systems ...

paper presents a discussion on the dynamic analysis of a planar multibody system with joint clearance (i.e., a non-ideal joint). A prediction procedure to estimate wear on simple geometries, such as a revolute joint, is then presented. Next, analysis of multibody systems with revolute joint wear, which involves integrating wear
