Run the swimming pool and lift the portion of the Polaris house containing the backup valve out of the water. Examine the backup valve for small cracks or other indications of a leak. A small trickle of water constantly flows through the valve, and when it's operating correctly, a stronger burst of water erupts from the valve every few minutes.

### **How to Troubleshoot a Polaris 360 Backup Valve | Hunker**

- If your Polaris® cleaner is connected to a dedicated cleaner line, adjust the diverter valve to increase the water flow to the cleaner.
- Make sure filter screen (k) is correctly positioned in Quick Disconnect.
- Check skimmer, pump basket, and main filter for debris restricting flow.
