Stereograms

Stereograms A stereogram is a picture within a picture. Hidden inside each image is an object which appears in 3D when viewed correctly. BrainBashers™ is a trademark.

BrainBashers - Stereograms

A 3D stereogram is a flat image that produces a three-dimensional effect when viewed in a certain manner.

3D STEREOGRAMS | 3D Stereograms

An autostereogram is a single-image stereogram (SIS), designed to create the visual illusion of a three- dimensional (3D) scene from a two-dimensional image. In order to perceive 3D shapes in these autostereograms, one must overcome the normally automatic coordination between accommodation (focus) and horizontal vergence (angle of one's eyes).

Autostereogram - Wikipedia

The stereograms on this page are autostereograms, which means that they are contained in a single image and do not require a stereoscope to view. Another type of stereogram consists of two images taken from slightly different angles, viewed through a stereoscope so that each eye sees only one image. Cross-view stereogramsare also fun.

Stereograms - puzzlewocky

Originally, stereogram referred to a pair of stereo images which could be viewed using a stereoscope. Stereoscope is a viewing device that allows a person to see 3D image from 2 slightly different 2D photographs or drawings. Today, there are many types of stereograms.
