Supporting Independent Language Learning Issues

A teacher who corrects homework, who supervises a dissertation, who gives language learning tips, who recommends a good grammar exercise, is giving support to independent language learning. However, cuts in classroom hours, changes in learners' lifestyles and work patterns, the concept of lifelong learning and new developments in technology have given a new impetus to independent learning.

Supporting independent language learning: development for ...

The chapters in this book describe a range of contexts for independent language learning around the world, some related to children, others to adults, some to classrooms, others to self-access centres or even to distance learning. They explore a number of issues to consider when supporting these learners.

Instructional scaffolding is the support given to a student by an instructor throughout the learning process. This support is specifically tailored to each student; this instructional approach allows students to experience student-centered learning, which tends to facilitate more efficient learning than teacher-centered learning. This learning process promotes a deeper level of learning than ...

Instructional scaffolding - Wikipedia

The Voyage of the Mimi, developed by Bank Street College, was one of the earliest attempts to use video and computer technology to introduce students to real-life problems (e.g., Char and Hawkins, 1987): students "go to sea" and solve problems in the context of learning about whales and the Mayan culture of the Yucatan.
