When to Use TIFF . TIFF (Tagged Image File Format) is suitable for any type of bitmap (pixel-based) images destined for print because this format uses that industry's CMYK color standard. TIFF produces large files, thanks to a common resolution of 300 ppi with no quality loss. TIFF also preserves layers, alpha transparency, and other special features when saved from Photoshop.

## **The Best Image Format Types for Different Needs**

-regex pattern: Search for files matching a regular expression.-type type: Search for a particular type. Type options include:-type d: Directoris-type f: Files-type l: Symlinks-uid uid: The file numeric user id is the same as the uid.-user name: The file is owned by the user that is specified.-writable: Search for files that can be written to.
