The geometry puzzles that are lighting up Twitter. I solved problem 3 in a somewhat unsatisfying way (giving names to relevant lengths, translating everything I knew from the geometry into algebraic relations between these quantities and then manipulating the algebra until I got what I wanted) but in the process I discovered something much more interesting:

Twenty Questions (Of Maddening, Delicious Geometry) - Math ...

The missing square puzzle is an optical illusion used in mathematics classes to help students reason about geometrical figures; or rather to teach them not to reason using figures, but to use only textual descriptions and the axioms of geometry. It depicts two arrangements made of similar shapes in slightly different configurations. Each apparently forms a 13×5 right-angled triangle, but one ...

The Tangram is an ancient popular Chinese puzzle that is often seen in math classes. The tangram is easy to make. It has seven shapes in total. A tangram has two large triangles, one medium triangle, two little triangles, one parallelogram and a square. AND, of course one of the puzzles is to put the seven pieces together to form the big square.
