If you do an opinion poll—which is not ethnographic interviewing—this is a particularly severe problem because there is not usually enough redundancy in answers for the bias to be evident. With opinion polls, intended for hundreds or thousands of respondents, it is possible to pretest alternate wordings of questions.

Interview Tips

We would generally recommend that an ethnographic approach may be suitable for the early stages of a user-centred project that deals with a particularly complicated or critical design challenge. This is because ethnographic methods allow a particularly deep understanding of a design problem's domain, audience(s), processes, goals and context ...

Ethnography: When and How to Use It | Spotless

Ethnography, because it uses observation as a central method, has an advantage in overcoming problems such as self-report that exist in other qualitative studies which only employ interview and/or focus group methods.
