The New Economy Of Nature

The economic valuation of nature is reaching a new dimension: elemental functions - such as carbon storage in forests - become ,ecosystem services' and nature itself - the forest - is viewed as ,natural capital'. Proponents of new markets and payments for ecosystem services did not lose time to set up web portals bundling their information.

New Economy of Nature | Heinrich Böll Stiftung

With nature as a source for inspiration, recreation and pure physical energy, Oslo and its people are truly powered by nature. This quality of life - in combination with one of Europe's strongest labour markets - has led to a steady population increase - close to 20.000 new citizens last year.
